# Daemon Handler Server Process

6 - monitoring parent process

5 - not really needed, but it is for better readability

4 - process commands (business logic)

3 - write (communicator)

2 - read (communicator)

1 - creates and runs DaemonHadler_Server

red - thread is blocked

white - real time

yellow - async

blue - some method is called now

green - thread sleeps

■ - handler   ■ - communicator   ■ - program
